

Back Cover and Stand, 17-inch Replacement Instructions

Follow the instructions in this sheet carefully. Failure to follow these instructions could damage your equipment and void its warranty.

Note: Online instructions are available at <http://www.apple.com/support/doiityourself/>.

Tools Required

- Use the screwdriver provided, or a Phillips #1 screwdriver

Part Location

Removing the Back Cover and Stand

1. Turn your computer off by choosing Shut down from the Apple () menu.
2. Disconnect all cables, and unplug the power cord from your computer.

3. Place a soft, clean towel or cloth on the desk or surface. Hold the sides of the computer and slowly lay the computer face down as shown.

4. Locate the three case screws circled below. You may have to lift the metal foot to locate the middle case screw. **Note:** These screws are captive; they are part of the display/bezel assembly and cannot be removed.
5. Using the tool provided, or a Phillips #1 screwdriver, loosen the three captive screws. **Note:** Turn the screws counterclockwise until they stop turning.

6. Holding the back cover by the metal stand, tilt the cover up and lift it off the computer. Set the back cover aside.

Installing the Replacement Back Cover and Stand

1. Remove the replacement back cover and stand from its packaging.
2. Replace the cover so that the slots on the top edge of the back cover mate with the tabs on the display housing.

3. Lower and press the cover into place until it fits snugly on the computer.

4. Tighten the case screws by turning them clockwise. You might need to tighten the middle screw first, then adjust the corner screws so the case settles into the display/bezel.

5. Position the computer in the upright position. Reconnect the power cord and remaining cables. Turn on the computer.
